

PENBERTHY

PENBERTHY LEVEL AND FLOW INDICATION

Emerson has named John H. Carter Company as the exclusive representative in all of Louisiana and parts of Mississippi, Alabama, Florida and Arkansas for Penberthy, effective December 1, 2018.

PENBERTHY LEVEL AND FLOW INDICATION PRODUCTS

Since 1886, Penberthy has been recognized as a global leader in high-quality level and flow indication products for pumping, mixing, or heating liquids and gases. The most notable of these devices are Sight Glasses, Armored Level Gauges, Magnetic Liquid Level Gauges, Gagecocks, Jet Pumps, Eductors, Injectors, and Sight Flow Indicators.

PENBERTHY LIQUID LEVEL GAUGES

Low, medium and high pressure tubular and flat glass gages in reflex and transparent styles.

PENBERTHY MAGNETIC LIQUID LEVEL GAUGES

Multiview™ Magnetic Liquid Level Gauge products offer a superior solution to liquid level monitoring and a viable alternative to glass level gauges, float switches, displacers and other mechanical and electronic level technologies.

PENBERTHY GAGECOCKS

Gagecocks provide a connection to the process vessel and isolate the gage chamber from the liquid content of the vessel.

PENBERTHY JETPUMPS, EDUCTORS AND INJECTORS

Penberthy Jet Pumps provide practical, simple, and cost effective alternatives to process industries to pump, mix or heat a range of liquids and gases with a variety of motive media.

PENBERTHY SIGHT FLOW INDICATORS

Penberthy dual window sight flow indicators are designed for the observation of flow in a process line.
