

Flow Measurement, Instrumentation & Control

- Flow Computers and Remote Terminal Units
- Power and Communication Systems: Radios, Antennas, Batteries, Solar Panels and Power Generators
- Gas and Liquid Measurement (Custody Transfer): Differential Pressure, Ultrasonic Flow and Turbine Meters
- Gas Analysis: Sampling Systems and Gas Chromatographs
- SCADA: Software and Integration Services
- Regulators: Self-Contained, Pilot-Operated and Smart Technology
- Control Valves and Dump Valves: Valves, Actuators and Digital Controllers
- Measurement and Control Instrumentation: Pressure and Pressure Differential, Temperature, Level, Flow and Composition
- Automated Valves: Rotary Valves, ¼-Turn Actuators, Pneumatic, Hydraulic or Electric Operated, Solenoid Valves
- Systems and Solutions: Design, Specification, Fabrication, Installation, Configuration, Acceptance Testing, Start-Up, Maintenance and Operations Programs
- Engine Optimization and Diagnostics
- Education Services and Training: Factory Certification Programs, On-Site Training, Technology and Equipment-Specific Curriculum and Locally-Conducted Industry Education and Roundtables
