Rosemount™ 2240S Multi-input Temperature Transmitter
for tank gauging systems

Provides multiple spot temperature measurement in liquid storage tanks, used for average temperature calculation and stratification correction

- Obtain outstanding temperature conversion accuracy of ±0.05 °C (±0.09 °F)
- Get ultra-stable temperature measurement for precise inventory calculations and custody transfer for API chapter 7.3 compliance
- Connect up to sixteen 3- or 4-wire temperature elements
- Include integrated water level sensor
- Benefit from convenient and safe installation with 2-wire IS bus power supply
Exact net volume calculations with highest precision average temperature measurement

The Rosemount 2240S Multi-input Temperature Transmitter provides multiple spot temperature measurement in liquid storage tanks. It is used for calculation of the average temperature of the liquid and corrects for stratification.

The Rosemount 2240S is approved for demanding custody transfer applications, which require very accurate level and temperature measurements for net standard volume calculations. It has an ultra high temperature conversion accuracy of ±0.05 °C (±0.09 °F). The IP 66/67 and NEMA® 4X certified robust design makes it suitable for installation in harsh environments.

The temperature transmitter supplies measured data, such as temperature and water level, via the intrinsically safe 2-wire Tankbus, to a Rosemount 2410 Tank Hub. Measurement data and status information can be viewed on a PC with the Rosemount TankMaster software, as well as on the integral display of the tank hub and the Rosemount 2230 Graphical Field Display.

Highly accurate multiple spot temperature and water level sensors

Rosemount 2240S can connect up to sixteen 3- or 4-wire temperature spot elements and an integrated water level sensor. The value from each individual spot temperature element, in combination with the level value from the radar gauge is used for average liquid temperature calculation.

The water level sensor is factory calibrated. If any adjustment is necessary during installation, it can easily be done with the Rosemount 2240S built-in on-line calibration feature.

Available temperature sensor versions are:
- Rosemount 565 Multiple Spot Temperature Sensor
- Rosemount 566 Multiple Spot Temperature Sensor for cryogenic applications such as LNG
- Rosemount 765 Multiple Spot Temperature Sensor with Integrated Water Level Sensor
- Rosemount 614 Cryogenic Spot Temperature Sensor

Precise and reliable measurements in cryogenic storage tanks

The Rosemount 2240S Multi-input Temperature Transmitter provides complete temperature measurements for cryogenic and refrigerated full containment storage.

Figure 2 illustrates an LNG Tank Gauging system with temperature transmitters for average liquid temperature measurement and online redundant temperature stratification monitoring. The system also includes temperature transmitters for skin/cool-down temperature measurement (white dotted line) and leak detection (red dotted line).

Ordering information

Specifications and options
See the Specifications and options section for more details on each configuration. Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See the Material selection section for more information.

Model codes
Model codes contain the details related to each product. Exact model codes will vary; an example of a typical model code is shown in Figure 3.

1. Required model components (choices available on most)
2. Additional options (variety of features and functions that may be added to products)
**Rosemount 2240S Multi-Input Temperature Transmitter**

The ultra-stable Rosemount 2240S is approved for demanding custody transfer applications, which require very accurate temperature measurements for net standard volume calculations. It can be used with a Rosemount 565, 566, or 765 temperature sensor. The Rosemount 2240S connects up to sixteen 3- or 4-wire temperature spot elements and an integrated water level sensor. Rosemount 2240S provides average liquid temperature for net volume calculation based on each individual spot temperature element in combination with the corresponding level value. It has an impressive temperature conversion accuracy of ± 0.05 °C (± 0.09 °F).

General specifications

Material selection

Emerson provides a variety of Rosemount products with various product options and configurations including materials of construction that can be expected to perform well in a wide range of applications. The Rosemount product information presented is intended as a guide for the purchaser to make an appropriate selection for the application. It is the purchaser’s sole responsibility to make a careful analysis of all process parameters (such as all chemical components, temperature, pressure, flow rate, abrasives, contaminants, etc.), when specifying product, materials, options, and components for the particular application. Emerson is not in a position to evaluate or guarantee the compatibility of the process fluid or other process parameters with the product, options, configuration or materials of construction selected.

Number of spot elements and wiring

Up to 16 RTD spot elements or averaging sensors can be connected to a Rosemount 2240S.

Rosemount temperature / water level sensors (models 565, 566, and 765)

Three wiring types can be used:

- 3-wire RTD with common return (1-16 spot elements)
- 3-wire RTD individual:
  - 1-16 spot elements with Rosemount 565 and 566
  - 1-14 spot elements with Rosemount 765
- 4-wire RTD individual:
  - 1-16 spot elements with Rosemount 565 and 566
  - 1-10 spot elements with Rosemount 765

**Rosemount 614 Cryogenic Spot Temperature Sensor**

The following wiring types can be used:
- 3-wire RTD individual (1-16 spot elements)
- 4-wire RTD individual (1-16 spot elements)

**Standard temperature sensor types**

Supports Pt-100 (according to IEC/EN60751, ASTM E1137) and Cu-90

**Metrology sealing possibility**

Yes

**Write protect switch**

Yes

**Configuration specifications**

**Configuration tool**

TankMaster WinSetup is the recommended tool for easy configuration of Rosemount 2240S. The Tankbus autoconfiguration feature, handled by the Rosemount 2410 Tank Hub, supports Rosemount 2240S.

**Configuration parameters (examples)**

**Temperature**
- Number of temperature sensor elements
- Temperature element type (spot or average)
- Temperature element position in tank

**Water level sensor**
- Level offset (difference between tank zero level and water zero level)
- Probe length (autoconfigured by Rosemount 765)

**Output variables and units**

Spot and average temperature: °C (Celsius), and °F (Fahrenheit)

Free water level (FWL): meter, centimeter, millimeter, feet, or inch
**FOUNDATION™ Fieldbus characteristics**

**Polarity sensitive**
No

**Quiescent current draw**
30 mA

**Lift-off minimum voltage**
9.0 VDC

**Device capacitance inductance**
See Product certifications

**FOUNDATION Fieldbus class (basic or Link Master)**
Link Master (LAS)

**Number of available VCRs**
Maximum 20, including one fixed

**Links**
Maximum 40

**Minimum slot time / maximum response delay / minimum intermessage delay**
8/5/8

**Blocks and execution time**

Auxiliary sensor input
Digital bus connection for water level sensor

Mechanical specifications

Housing material
Polyurethane-coated die-cast aluminum

Cable entry (connection/glands)
Three ½ - 14 NPT entries for cable glands or conduits. Two metal plugs to seal any unused ports are enclosed in the delivery.
Optional:
- M20 x 1.5 conduit / cable adapter
- Cable glands in metal (½ - 14 NPT)
- 4-pin male eurofast connector or A size Mini 4-pin male minifast connector

Rosemount 565/566/765 connection
M33 x 1.5 female threaded connection
Optional:
- An M32 adapter or M32 gland can be used if the Rosemount 2240S is installed away from the sensor

Rosemount 614 connection
Optional cone with M33 x 1.5 female threaded connection

Installation
The Rosemount 2240S can be installed directly on top of the temperature / water level sensor or remotely installed on a 33.4-60.3 mm (1 to 2-in) pipe or on a wall

Weight
2.8 kg (6.2 lbs)

Environmental specifications

Ambient temperature
-40 to 70 °C (-40 to 158 °F)
Minimum start-up temperature -50 °C (-58 °F)

Storage temperature
-50 to 85 °C (-58 to 185 °F)
Humidity
0-100% relative humidity

Ingress protection
IP 66 and 67 (NEMA® 4X)

Transient / built-in lightning protection
According to IEC 61000-4-5, level 1 kV line to ground.
Complies with IEEE 587 Category B transient protection and IEEE 472 surge protection.
Product certifications

Rev 2.9

European directive information
The most recent revision of the EU Declaration of Conformity can be found at Emerson.com/Rosemount.

Ordinary location certification
As standard, the transmitter has been examined and tested to determine that the design meets the basic electrical, mechanical, and fire protection requirements by a nationally recognized test laboratory (NRTL) as accredited by the Federal Occupational Safety and Health Administration (OSHA).

Installing equipment in North America
The US National Electrical Code® (NEC) and the Canadian Electrical Code (CEC) permit the use of Division marked equipment in Zones and Zone marked equipment in Divisions. The markings must be suitable for the area classification, gas, and temperature class. This information is clearly defined in the respective codes.

### Special Conditions for Safe Use (X):

1. When the thread adapter or blanking plug is used with an enclosure in type of protection increased safety "e" the entry thread shall be suitably sealed in order to maintain the ingress protection rating (IP) of the enclosure. See certificate for special conditions.

2. The blanking plug shall not be used with an adapter.

3. Blanking Plug and Threaded Adapter shall be either NPT or Metric thread forms. G½ thread forms are only acceptable for existing (legacy) equipment installations.

Dimensional drawings

Figure 4: Rosemount 2240S

A. Optional tag plate
B. M33
C. Optional mounting kit

Dimensions are in millimeters (inches).

Installation options
- Installed with a multiple spot temperature sensor
- Installed separately on a 33.4-60.3 mm (1 to 2-in.) pipe, or on a wall
