

## ASSET MONITORING & HEALTH ANALYSIS SOLUTIONS (AMS)

Implement predictive intelligence and integrated protection technologies to reach business goals and achieve top-quartile reliability. With AMS technologies, you get asset management and condition indicator capabilities specific to the nature and criticality of production assets.

### MAJOR ASSET PERFORMANCE SOFTWARE

#### PLANTWEB OPTICS

A collaborative digital environment with multiple assessment interfaces for a holistic view of asset health, secure yet flexible architecture, workflow integration to drive proactive operations, and a built-in historian.

#### KNET ADVANCED ANALYTICS

Using a combination of Advanced Analytics and Event Detection techniques, KNet pulls information from control systems, databases, plant applications and operation procedures to detect abnormal events, manage performance deviations, increase visibility across the enterprise, all to deliver knowledge better and faster to shorten decision-making time.

### PREDICTIVE / DIAGNOSTIC SOFTWARE

#### AMS MACHINE WORKS / AMS MACHINERY MANAGER

Combines predictive maintenance techniques with comprehensive analysis tools to provide easy and accurate assessment of the machinery health in the facility. The monitoring solution and/or device you choose will determine what software is right for your operation. Also available as a SaaS or Cloud-hosted software option.

#### AMS DEVICE MANAGER

Provides a window into the health of intelligent field devices. Based on real-time condition data from your intelligent field devices, plant staff can respond fast and make informed decisions on whether to maintain or replace field devices.

#### AMS DEVICE VIEW

Extend your asset management capabilities to anywhere with an internet connection. View device health and calibration status information using mobile-friendly dashboards during projects.

#### AMS INSPECTION ROUNDS

Digitizes information collected during inspection routes to drive operations and maintenance action. Improve data accuracy, identify safety issues earlier, gain deeper insights, and make better decisions.
